

Department of Artificial Intelligence and Data Science

B.Tech. Sem: VI Subject: Natural Language Processing Laboratory (DJ19ADL602)

Experiment 1

Name:

SAP ID:

Date:	
Aim	Pre-processing steps in NLP: Tokenization, stop word Removal, Lemmatization, stemming using NLTK and SPACY
Software	Colab
Pre-requisite	Internet and required dataset
Theory	<div>Explain all the points in detail</div> <div><div>1. Explain Tokenization using NLTK and SPACY</div><div>2. Stop Word Removal using NLTK and SPACY</div><div>3. Lemmatization using NLTK and SPACY</div><div>4. Stemming Using NLTK and SPACY</div><div>5. Tokenization using NLTK and SPACY</div></div> <div></div>
Result	<div>Paste Results here</div>
Conclusion	Write your detail understanding about the experiment.
